

We're still looking for the final frontier.

The sky is never the limit for IEEE members. From yesterday's Mercury missions, to today's satellite constellations, to tomorrow's colony on Mars, we're bringing expertise and innovation where no one has gone before.

In fact, IEEE members have been part of nearly every major technical development of the last 130 years. So when you need to draw on the most advanced technical knowledge on Earth, or anywhere else, you'll see that IEEE members aren't just waiting for the future, they're engineering it—one trek at a time.
