

There's no such thing as science fiction.  
Just stuff we haven't made yet.

From 20,000 feet under the sea to the dark side of the moon, and everywhere in between, you'll find the work of IEEE members. It's in a thousand things our founders could only dream of in 1884.

In fact, IEEE members have taken the stuff of science fiction and made it part of every day life. That's why, whether you need to draw on the knowledge of technology's past pioneers or today's innovators, one fact is clear—you'll see that IEEE members aren't just waiting for the future, they're engineering it—and the best chapters are yet to come.
